Professional Summary

Results-driven entry-level Data Engineer and Software Developer with a 93% aggregate MCA from JNTUA University. Hands-on experience designing and deploying ETL pipelines on Azure Databricks, processing large-scale JSON data with PySpark, and integrating Oracle-to-Azure SQL migrations via Azure Data Factory. Skilled in Python, SQL, Java, NLP, and Big Data technologies. Eager to deliver scalable, data-driven solutions in a fast-paced engineering environment.

Technical Skills

Programming Languages	Python, SQL, Java, OOP Principles
Big Data & Cloud	PySpark, Apache Hadoop, Azure Data Factory (ADF), Azure Databricks, Azure Data Lake Storage (ADLS), Oracle
Web Technologies	HTML5, CSS3, JavaScript
Machine Learning / NLP	BERT, RoBERTa, NLP pipelines
Databases & IDEs	MySQL, Visual Studio Code, Oracle SQL
Productivity Tools	Microsoft Office Suite (Word, PowerPoint, Excel)

Experience & Projects

Data Engineering Project — Procter & Gamble (P&G) **2024 – 2025**
Azure Data Engineer (Academic / Industry Project) *Chittoor, India*

- Engineered end-to-end ETL pipelines in **Azure Databricks**, migrating 100%+ of required data from Oracle to Azure SQL using **Azure Data Factory**, reducing manual data-transfer effort by an estimated 60%.
- Processed and transformed large-scale **JSON-formatted datasets** from ADLS using **PySpark DataFrames**, enabling structured analytics for business teams.
- Optimized **Spark jobs** for performance and cost efficiency, tuning partitioning strategies and caching to improve pipeline throughput.
- Developed and scheduled **batch processing workflows** with orchestration tools, ensuring reliable, repeatable data delivery aligned with SLA requirements.
- Implemented **data quality and validation checks** to maintain consistency across ingestion layers, supporting data-driven decisions for cross-functional business teams.

Online Recruitment Fraud Detection System **2024**
NLP / Machine Learning Project *SITAMS, JNTUA*

- Designed and trained an **NLP-based classification model** using **BERT** and **RoBERTa** to detect fraudulent job postings on recruitment platforms, targeting improved precision over baseline models.
- Pre-processed and tokenized unstructured job-posting text corpora; fine-tuned transformer models to distinguish genuine from fraudulent listings.
- Evaluated model performance using precision, recall, and F1-score metrics, iterating on hyperparameters to maximize classification accuracy.

Access Control System Using RFID **2023**
Embedded Systems / IoT Project *SV University*

- Built a **secure access control system** leveraging RFID technology to authenticate and restrict entry to sensitive areas, eliminating unauthorized access risks.
- Programmed RFID readers and tag verification logic, integrating hardware and software components to deliver a fully functional prototype.

Internships

ePub & XML Developer Intern **4 Months**
ASCUSTECH Private Limited

- Developed and structured digital content using **ePub** and **XML** standards, ensuring cross-device compatibility and accessibility compliance.

Python Developer Intern **1 Month**
Native Softtech

- Built Python scripts to automate repetitive data processing tasks, improving team productivity and reducing manual workload.

Salesforce Developer Intern **Short-term**
Salesforce

- Gained exposure to Salesforce platform configuration, custom object development, and CRM workflow automation.

Education

Master of Computer Applications (MCA) **2023 – 2025**
Sreenivasa Institute of Technology and Management Studies (JNTUA University) *Chittoor, India* Aggregate: **93%**

BSc — Mathematics, Electronics, Computer Science (MECS) **2020 – 2023**
Vijayam Science and Arts Degree & PG College (SV University) *Chittoor, India* Aggregate: **84%**

Certifications

- **Certified Python Programming Associate** — PCAP
- **NPTEL Certification** — Internet of Things (IoT)
